A FOUR DAY COURSE TEACHING THE PRINCIPLES OF DEFORMITY CORRECTION

28th June - 1st July 2017 Mercure Hull, Grange Park Hotel, Hull

First three days are dedicated to an instructional and practical course teaching the principles of deformity planning by clinical and radiological analysis. Will include the application of appropriate osteotomy techniques and fixation methods.

Last day of the course, speciality day, will focus on congenital and acquired Paediatric and adult hip reconstruction. World renowned surgeons will cover the analysis, principles and management of hip deformity, osteotomies around hip, non surgical management and proximal femoral non union. Guest lectures on pelvis support osteotomy and intra articular deformities

2017 - THEME DAY - HIP RECONSTRUCTION
